

Automatic, High Speed Bagging System UltraStar™

Key Features

- Automatic reject of unsatisfactory bags
- Handles paper, poly and polywoven bags
- Servo driven for fast, smooth, & precise operation
- Fully integrated PLC control system with common HMI for scale and bagger available
- Integral sealing for paper, poly or polywoven bags
- Dual filling spout for higher speed
- Simple design features 1/3 the number of moving parts as competitive baggers

Automatic, High Speed Bagging System

UltraStar™

The UltraStar is a high speed bagging system that offers production-enhancing features for large bags that were formerly found only on packaging systems for small bags. The UltraStar system is ideal for industries where speed and line efficiencies are critical. The system can package mid to large sized bags of product at speeds up to 38 bags per minute.

Key Benefits:

- Eliminates spillage
- Reduces downtime
- Provides easier troubleshooting
- Minimizes dusting
- Maintenance reminders

Variety of Industries:

- Pet food
- Sugar
- Salt
- Seed
- Fertilizer
- Rice
- Chemical

Additional Features

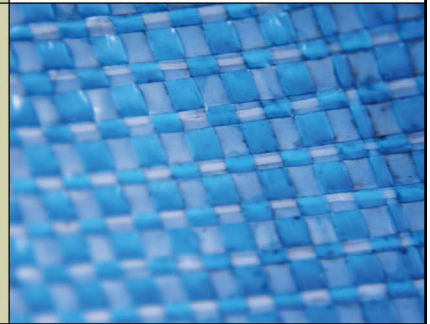

- Bar code scan auto-changeover
- Graphic display of faults and fault durations
- VPN router for PLC remote troubleshooting
- Bag top registration
- Integrated laser bag printing
- Bag deflation system
- Scale control
- Miller Weldmaster pinch polywoven sealer

Accommodates Many Bag Types

Paper

Polywoven

Poly
